Community Details

Name of the community: Mulearn

What is this community?

Mulearn operates as a community within GTech, a consortium comprising over 200 IT company CEOs in Kerala. Its primary objective is to facilitate a seamless connection between academia and the industry. This inclusive community is open to all college students, regardless of their academic degree, and membership is free of charge. For more information, visit mulearn.org.

The community leverages the Discord platform to organize and conduct its events. Additionally, Mulearn offers a variety of courses covering tech topics such as web development, app development, and more. To further support students in their learning journey, the community connects them with mentors from the industry, providing valuable guidance to those facing challenges.
